

# Operating Instructions

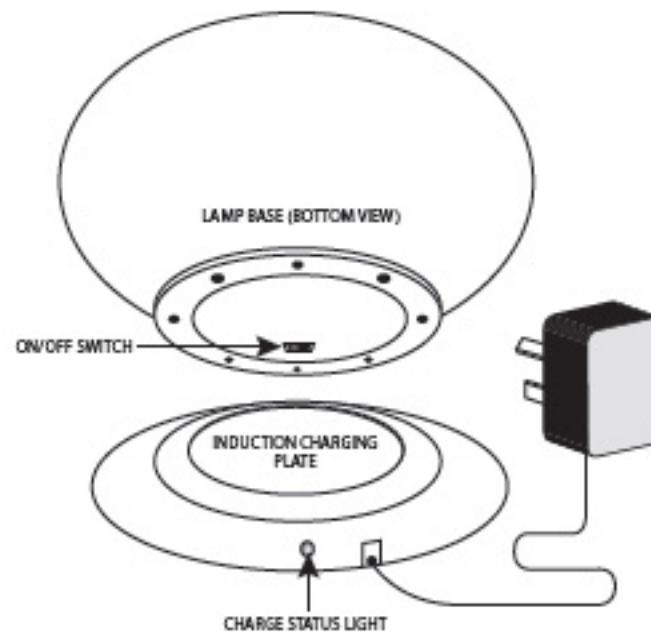

## CHARGING VIA DIRECT DC CHARGER

1. Plug the adapter into any wall outlet with an input voltage of AC 110V~240V
2. Insert the charging plug into the charging socket in the base of the lamp
3. The charge status light will turn from red to green when fully charged. (Approx 6 hours).

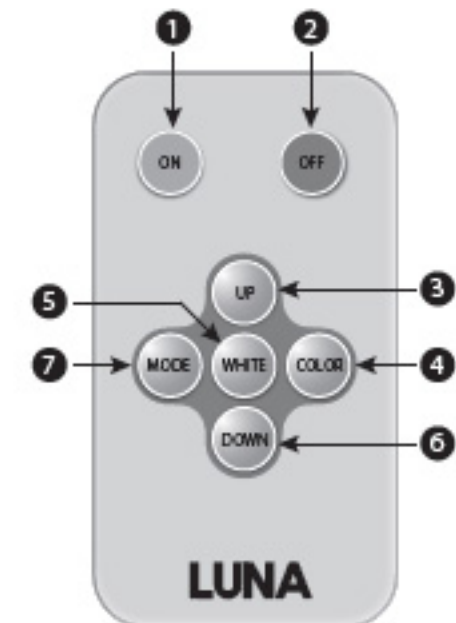

## CHARGING VIA INDUCTION PLATE (If equipped)

1. Plug the adapter into any wall outlet with an input voltage of AC 110V~240V
2. Place the lamp on top of the charging plate to charge
3. The charge status light will turn from red to blue when fully charged. (Approx 6 hours).

## REMOTE CONTROL

1. Switch ON (note: device can be operated by on/off switch at base of actual unit as an alternative)
2. Switch OFF
3. Increase brightness
4. Press to change colours
5. Press for white color
6. Decrease brightness
7. MODES  
Press 1x – enter flash mode  
Press 2x – enter strobe mode  
Press 3x – enter fade mode  
Press 4x – enter smooth transition mode  
Press 5x – return to flash mode

## TECHNICAL SPECIFICATIONS

- Adapter Input: AC 110V-240v 50/60HZ
- Charging Plate Input: DC 7.5V
- Operating Current: 1A
- Remote Control Distance: ≤5meters

**Warning: The remote control, adapter and charging plate are not waterproof. Keep them away from water.**
